

CLEARWATER NOXIOUS WEED CLINIC

March 22, 2017
Orofino Community Church
14233 Hwy 12
Orofino, Idaho

March 23, 2017
Idaho Department of Fish and Game
Conference Room
Lewiston, Idaho

AGENDA

TIME	TOPIC	SPEAKER
8:30-8:55	Registration, Take the Weed Quiz	
8:55 – 9:00	Welcome, Introductions and Announcements Live weeds from across the CBCWMA will be potted and available for participants to try to identify (quiz) the weeds. Each weed will be explained (biology and treatments) at the end of the day prior to passing out herbicide recertification credits.	Paul Brusven NPBC
9:00 – 10:00	Property Access Treatment —This talk will present the tools available to control Invasive/noxious weeds on access points and roads to properties. We will look how to strategize on controlling weeds from invading property access points and methods of controlling invasive weeds through IPM. This talk will explain conditions where and types of herbicides are best suited to controlling undesirable vegetation to the best time to mow and when to simply hand pull weeds. A theme of weed prevention will be taught in this presentation along with following the pesticide product label.	Ken Hart, UI
10:00 – 10:15	Break	
10:15 – 11:00	Aquatic/Riparian —This talk will look at weeds found in and near surface waters and methods to control them (IPM) and new invaders to keep an eye out for and methods to prevent new weeds from becoming established in sensitive environmental areas.	Tom Wolf, ISDA
11:00 – 12:00	Integrated Approach to Manage Annual Grasses — A look at common annual grasses in North Central Idaho and How to control them utilizing all tools found in the IWM tool Box in respect to different land uses. Research will be looked at as far as herbicide treatments and successes.	Tim Prather, UI
12:00 – 1:00	Lunch (on your own)	
1:00-2:00	Cover Crop/Grazing —This talk will utilize case studies and personal experiences using cover crops and grazing to enhance productivity of lands by reducing invasive weed invasion and preventing weeds to encroach lands with good vegetation. This talk will have an emphasis of the power of implementing cultural control practices and how and when to utilize the other weed control methods through IPM.	Drew Leitch, Landowner and manager
2:00– 3:00	Herbicide Control of Common Noxious weeds in North Center Idaho --utilizing Herbicides on Right-of Ways, Large Open Upland Areas, and Riparian Areas (herbicides names, rates, and environmental restrictions/safety precautions) and how herbicides are used in an IPM system and the Importance of following the pesticide Label.	Jerry Ellis Wilber Ellis
3:00 – 3:15	Break – Plant Quiz Due	
3:15 – 4:15	Local Suppliers for Herbicide and Equipment —This talk will focus on local suppliers in the area speaking on equipment and herbicides available to address managing weeds on both large and small properties. This presentation slot will also provide demonstration of a variety of equipment and how to calibrate for herbicides and grass seed rates. A variety of weed control equipment will be on site for demonstration purposes for the participants	Suppliers
4:15 – 4:30	Wrap up and plant identification (potted weeds) winner announcement and pass out recertification credits.	Paul Brusven

Clinic is hosted by the Clearwater Basin Cooperative Weed Management Area. Admission is free and six pesticide license recertification credits will be available (morning credits and afternoon credits).
